Wasdom ESP32 operating algorithm:

1-Download Arduino IDE.

2-Go to preferences and paste this link (https://dl.espressif.com/dl/package_esp32_index.json

) In additional board manager URLs.

3-Go to tools then board "Arduino Uno" then board manager.

4-In the board manager write ESP32 to download the package.

5-Repet step 3 but go to ESP32 Arduino and choose WEMOS D1 MINI ESP32.

6-In tools also go to port and choose COM3.

7- If you want to perform action with ESP32 go to example in file and choose blink and it'll show you the code to try it.
